# Index to Volume One of Advances in Plastics Technology

(predecessor to Advances in Polymer Technology)

**Vol. 1 No. 1**

*The Technology of Plastics Profile Tooling
*Solvent Blown Thermoplastic Foams
*Mold Cooling

**Vol. 1 No. 2**

*Coextrusion and Dual Extrusion Technology
*An Analysis of Twin-Screw Extruder Mechanisms
*Structural and Coinjection Foam Molding
*Solid Phase Forming of Plastics by High Frequency Impact

**Vol. 1 No. 3**

*Orientation & Ultra Orientation of Polymers by Extrusion
*On Line Computer Control of the Extrusion Process
*Controls for Injection Molding of Thermoplastics

**Vol. 1 No. 4**

*Computer Simulation of Thermoplastic Injection Molding
*Sheet Co-Extrusion After 15 Years: A 1981 Status Report
*A New Approach to Mold Productivity Improvement
*Extrusion Die Design for Thermoplastic Materials—Comparison of Extrusion Ease with PVC Materials
*Continuous Molding Extrusion Process

Back issues available for Advances in Plastics Technology (predecessor to Advances in Polymer Technology) in print or microfiche at $25 a piece. To order, send check to Alfred Jaeger, 66 Austin Blvd., Commack, N.Y. 11725 516-543-1500
